

ENVIRONMENTALLY FRIENDLY PACKAGING

## DRI-FRESH® RESOLVE

Absorbent display surface for meat products

**Dri-Fresh® Resolve is the ultimate absorbent meat presentation surface. Three years in development, Resolve is a unique and highly developed product offering exceptional 'Meat Saver' characteristics which completely eliminate meat discolouration. It also extends further to control the surface moisture of the meat, which ensures that the underneath looks as fresh as the top. Resolve can be used as absorbent pads in retail packs through to display counters.**

**Dri-Fresh® Resolve is manufactured using a unique, proprietary process without adhesives or bonding materials and is available in a variety of sizes and shapes to suit.**

**Resolve is composed from non-GM corn starch film thermally laminated to a fully compostable FSC cellulosic absorber. Resolve will decompose quickly and therefore supports consumer sensitivity to food packaging.**

- ✓ ***Unique highly developed presentation surface providing exceptional 'Meat Saver' properties and surface moisture control***
- ✓ ***Fully bio-degrades in home compost***
- ✓ ***Next generation absorbent technology***
- ✓ ***Can be used in retail packs or display counters***
