

Roast-it[®] oven-safe absorbent pads

Roast-it[®] is the first absorbent pad designed for direct-to-oven packaged foods. In addition to providing effective absorbency in the pack **Roast-it[®]** absorbs fat and juices evolved during the cooking process itself. The result is cleaner, crisper, healthier food and safer and easier handling of the cooked product.

- ✓ **Effective absorbency before and during cooking**
- ✓ **No need to remove the absorbent pad before cooking**
- ✓ **Healthier, crisper and cleaner food**
- ✓ **Safer handling of the cooked product**
- ✓ **Manufactured in BRC/loP accredited facilities and RAPRA approved for direct food contact.**

Roast-it[®] pads are available in a range of absorption levels and sizes to suit all applications

Roast-it[®] absorbent pads can be integrated into any packaging format to provide innovative and cost effective packaging solutions

Roast-it[®] is just one product from the Sirane range of innovative packaging products and systems. Our development scientists are available to help realise your ideas and aspirations. Call Sirane for more details.
