

IT DOESN'T COST THE EARTH

Ovenable Foil Tray Inserts For all ovenable food products

Ovenable Foil Tray Inserts is an innovative new product from BioPak. A fantastic way to enhance your food presentation. Direct from the chilled display to the oven. They divide the tray into two or more sections. Cradling the food in the retail pack whilst in transit preventing food from moving around, thus enhancing product presentation.

Ovenable Foil Tray Inserts are specifically designed for your foil tray. Single or Double sided, with or without absorbency. Size of compartments to suit your application. Many sizes available or complete bespoke service to suit.

Ovenable Foil Tray Inserts allow you to display retail packs on their side offering an effective use of space.

No longer is the food product too small for the tray. Attractive retail packs allowing separation of product.
