

Sugarcane containers, plates & bowls

- EN13432: European Commercial Compostable Certified
- Valid until: 31/05/2021

What is EN 13432?

The criteria for the industrial compostability of packaging are set out in the European standard EN 13432. EN 13432 requires the compostable plastics to disintegrate after 12 weeks and completely biodegrade after six months. That means that 90 percent or more of the plastic material will have been converted to CO₂. The remaining share is converted into water and biomass – i.e. valuable compost. Materials and products complying with this standard can be certified and labelled accordingly.

Biodegradable certification in accordance to DIN CERTCO, visit www.dincertco.de

CERTIFICATE

Certificate holder	BioPak Pty Ltd. 101 Grafton Street BONDI JUNCTION NSW 2022 AUSTRALIA
Product	Products made of compostable materials for industrial composting
Type, Model	White and Brown molded bagasse packaging
Testing basis	DIN EN 13432:2000-12 AS 4736:2006 Certification scheme Products made of compostable materials (DIN-Geprüft) (2017-10)
Mark of conformity	
Registration No.	960096
Valid until	2021-05-31
Nutzungsrecht	This certificate entitles the holder to use the mark of conformity shown above in conjunction with the specified registration number. Further information see annex.
